

Offer of Market Beating Electricity Prices through Business Network (SW)

Business Network (SW) have secured market beating Energy prices for members.

Small businesses that are members of the network can benefit from a centrally negotiated group price that is unavailable on the open market with one of the major UK energy suppliers.

This has been secured thanks to Chris Gordon of Auditel. Generally Auditel work for larger businesses but as a way of giving something back to the network (and as a way of demonstrating Auditel's purchasing power!) these prices can be offered to all current members.

A small Bristol shop recently saved c.£400 or 33% via these prices.

If you are:

- Not currently in a fixed price contract (most small businesses are on rolling tariffs)
- Or are very near to the end of a fixed price contract
- Are a small business

S	03	123	456	
	23	6789	0123	456

(A small business will usually have 03 or 04 in the top left box of the supply /MPAN number – as above. This number is specific to the supply – a company can have more than one supply and therefore do not confuse with your account number)

If you want free access to these prices please email the following to chris.gordon@auditel.co.uk

- The full supply/MPAN number as per the graphic above (this should have an S followed by 21 numbers)
- The full supply address (and billing address if different)
- Your contact details (email and phone)
- Your current supplier
- The current unit prices and standing charges you pay so that we can check that you will definitely be saving money by switching
- Chris will let you know what price you can be offered via this scheme (prices vary by location and profile)

If you are a small business on domestic supply (01 or 02 in the top left box) there could still be savings either via these prices or by using www.communitysave.co.uk to get impartial domestic energy prices.
